

ACRD Series

Revolving Door Air Curtains

ACRD is an ideal air curtain solution for revolving doors. The air curtain is installed above the door and the exhaust duct is adapted to the diameter of the door, which gives a neat and discrete solution.

A revolving door prevents continuous drafts but still lets in a certain amount of

cold air at every rotation. The air curtain prevents the cold air from penetrating and gives good heating comfort.

The ACRD consists of a unit and an exhaust duct adapted to the shape and colour of the revolving door.

Model Range

Available with heating capacities ranging from 8kW to 30kW for door diameters of between 1000mm and 6000mm.
